Predavanje:

USTVARIMO KULTURO SOUSTVARJANJA Z ZEMLJO

Naša moderna civilizacija se nahaja v fazi temeljne preobrazbe. V bodoče ne bo več mogoče karkoli ustvarjati na Zemlji brez da bi človek osebno in človeška skupnost kot celota vzdrževala živ, zavesten in soustvarjalen stik z Zemljo kot partnersko zavestjo in kot stvarnico življenja na domačem planetu. Temu primerno je potrebno tudi pravočasno spremeniti temelje ekonomije. Integralna zelena ekonomija naj postane ekonomija sodelovanja z elementarnimi bitji narave utemeljenem na partnerskem odnosu med človeštvom in Zemljo.

TO CREATE A GAIA RELATED CULTURE

Our modern civilization goes through a phase of basic transformation. In the future it will be not any more possible to create anything upon the Earth without that human beings individually and humanity as a whole would uphold a living, conscious and co-creative relationship with the Earth as a partner consciousness and creator of life upon our home planet. Accordingly it needs in time to change the foundation of the economic processes. The integral green economy of cooperation with the elemental beings of nature based upon the partnership between humanity and the Earth.
